

Can JUSP help?

Deciding whether JUSP is right for your institution

To help you decide if JUSP (a usage statistics portal provided by Jisc) is right for your institution we have created a simple assessment tool. Decide whether each statement applies to you and then see whether JUSP can help you.

Usage data is an essential part of JUSP, and so it is important to first check that we can collect usage data for you.

Are your digital resources covered by JUSP?	Yes/No	Can JUSP help?
We have a number of journal subscriptions with publishers listed on the participants page http://jusp.jisc.ac.uk/participants/		✓
We have a number of books hosted with suppliers listed on the participants page http://jusp.jisc.ac.uk/participants/		✓
We have a number of databases with providers listed on the participants page http://jusp.jisc.ac.uk/participants/		✓
We have a number of resources from providers not listed on the participant page. (e.g. The Burney Collection, Primal Pictures, etc)		✗

Can we collect usage data for you? Great! Now find out how JUSP can help you. If you answer “yes” to any of the following, this would indicate JUSP will be useful to you.

What do you need to be able to do with usage data?	Yes/No	Can JUSP help?
We want a picture of our journal usage through both publishers and intermediaries (e.g. EBSCOhost and IngentaConnect)		✓
We need to routinely collect and analyse usage data for journals, books or databases		✓
We need usage data to help us make decisions about renewals, substitutions and cancellations		✓

We need to report usage data to others and monitor trends in usage over a number of years		✓
We want to be able to report on usage of our resources quickly and easily		✓
We need to compare usage across a range of different publishers		✓
We need to compare our usage to groups of other institutions		✓
We need comparable, standardised data		✓
We need to be able to export usage data into other applications, e.g. spreadsheets (Excel), library or electronic resource management systems or usage statistics tool (UStat, EBSCO Consolidation etc.)		✓

What next?

Visit **How to join JUSP** at <http://jusp.jisc.ac.uk/join/>

JUSP is relatively quick and easy to set up. After signing the agreement via Jisc Collections, we will request some details from you and the publishers. We then gather historical usage data back several years (this varies from publisher to publisher depending on availability), and you can start to run reports as soon as data have been added.

Questions
