

The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a “one-stop shop” for libraries to view, download and analyse their journal usage reports from multiple publishers. It responds to current financial challenges with time and cost saving benefits.

JUSP welcomes new participant

We are pleased to welcome Bradford College who joined JUSP this month, bringing the total number of participants to 174.

Ebooks update

Work on the JUSP ebooks project is continuing.

This month we have carried out further testing and evaluation of COUNTER book reports.

In addition, an initial survey has been sent out to the sample libraries to help gain an understanding of the current state of ebook usage data collection and analysis. We have also sought feedback on the features that would be desirable in the JUSP ebooks service.

CILIP Conference 2-3 July

Come and join Jo Alcock, from the JUSP team, at her masterclass on using usage statistics to demonstrate value.

Making the Most of JUSP workshop, London, 11th June

We still have a few places left at our next workshop which will take place at the University of Westminster, London, on June 11th.

The workshop will provide you with an opportunity to:

Learn more about how JUSP can help you understand e-journal usage and introduce you to some of its more advanced features

Exchange experiences with other members of the JUSP community

Find out more about how JUSP is interoperable with other services including KB+

Provide feedback to the JUSP team to inform development of the service

Book your place at: <https://www.eventbrite.co.uk/e/making-the-most-ofjusp-london-tickets-15417917406>

Contact Us

You can keep up-to-date with project developments by visiting our website www.jusp.mimas.ac.uk.

We welcome your views on your experience of using the website and portal.

Please get in touch if you have comments, questions or ideas for future developments.

Core titles update

Core titles from JUSP have now been copied across to KB+ and our colleagues there have been undertaking the required development work.

Following user testing and implementation by KB of any further changes identified during testing, the system will be made live.

JUSP systems have been updated in readiness for this.

We will keep you informed via the JUSPlibraries mailing list when we have further information.

Latest webinar recording available

Following our 'JUSP in practice' webinar where speakers from three of our participating institutions spoke about how they used JUSP, the recordings from the webinar are now available on the Events and Training page of our website as follows:

Slides:

How do I...?

If you are new to JUSP or an infrequent user, you may have questions about how you perform certain tasks or see certain information in JUSP.

We have a collection of support materials including guides to reports (<http://jusp.mimas.ac.uk/guides-to-reports/>), an FAQ (<http://jusp.mimas.ac.uk/faq/>), use cases (<http://jusp.mimas.ac.uk/use-cases/>) and a glossary (<http://jusp.mimas.ac.uk/glossary/>).

To assist you in using these, we have scheduled a series of tweets asking a number of these 'How do I...@ questions and pointing you to locations where you will find that information on the JUSP website. You can follow JUSP on Twitter at @JUSPSTATS.

If you have a question that you don't see an answer to or if you need more detailed information about anything, please feel free to contact the JUSP helpdesk at any time jusp@mimas.ac.uk. We recommend that you send your queries to the helpdesk rather than to a specific member of the JUSP team as this will enable us to forward your query to the most appropriate person.

Data updates

We are liaising with publishers whose data are moving off the Metapress platform and will keep you updated via the JUSPlibraries mailing list as to the availability of their usage statistics.

We are pleased to report that, following Emerald's move to a new platform last year, up to date JR1, JR1a and JR1 GOA data are now available in JUSP.
