The Jisc Usage Statistics Portal (JUSP)

The Jisc Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a "one-stop shop" for libraries to view, download and analyse their journal and book usage reports from multiple publishers.

Season's greetings

Best wishes over the festive period from all the JUSP team. We look forward to welcoming you back in 2017.

Reflections on 2016

In 2016 we have:

- ✓ launched the JUSP Books Portal, and registered 399 individuals across 138 institutions
- ✓ added 13 new libraries
- ✓ run 3 webinars and 2 workshops
- ✓ included ProQuest JR1 data as an aggregator
- ✓ added JR2 for 14 publishers, 2,614,121 data entries
- ✓ added JR5 for 13 publishers, 44,356,581 data entries
- ✓ added 57 million bits of JR1, JR1a and JR1 GOA data

In 2016 so far, you have:

- ✓ accessed the Journal Portal **18,480** times, run **46,665** journal reports, and exported **6,617**
- ✓ accessed the Book Portal **666** times, run **2,353** reports and exported **232**

JUSP Helpdesk

The JUSP helpdesk will be closed from 1pm on Friday 23th December, and open again from Tuesday 3rd January.

Platform changes

We're working with a number of publishers to ensure smooth transitions from old to new stats platforms - APS, AIP, SAGE, and OUP.

Survey reminder

The latest JUSP Community Survey closes on 31st December 2016. Thank you very much to everyone who has responded.

If you haven't yet done so the survey can be found at: https://www.surveymonkey.co.uk/r/juspcommunitysurvey2016

Looking forward to 2017

2017 is already looking to be a busy year for the JUSP team. Some of our key priorities for the first 6 months of 2017 include:

COUNTER Release 5 – of key interest are the upcoming changes to be made in the COUNTER Code of Practice Release 5. This is scheduled for draft release in Spring 2017, with the final Code anticipated in the 2nd half of 2017. This is likely to require that publishers and vendors are compliant by late 2018. The team will be working with COUNTER to support development of the standard, and with JUSP libraries to ensure that changes are reflected appropriately in the JUSP interface.

Additional COUNTER reports – work to harvest JR2 and JR5 COUNTER reports will continue during the early part of 2017. We will continue to explore opportunities for provision of database reports, subject to availability of compliant vendors and demand from participating libraries.

JUSP e-book service – following release of the new e-books service in 2016, work will continue to develop Portal functionality and content. The team will focus on increasing e-book publisher participation in response to your feedback provided during a recent survey of publisher priorities. We are gathering information about your requirements for assessing and evaluating e-book usage data and we'll use this information to support development of the service.

E-book usage data research - the challenges affecting development, delivery and management of consistent e-book usage data and services is the subject of research currently being undertaken by Jisc. The team will report on the outcome of this research in 2017. In the meantime, read about the research here: http://www.jisc-collections.ac.uk/UKSG/385/Comparing-apples-and- pears-the-challenges-of-measuring-e-book-use

Training and support – We have a series of training events, workshops and webinars scheduled for early 2017 and will be providing more information via the mailing list in the new year. Furthermore, a series of case studies outlining the ways in which JUSP is being used may be helpful for staff training. These are planned for release in 2017.
