

The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) provides a “one-stop shop” for libraries to view, download and analyse their usage reports from NESLi2 publishers <http://www.jisc-collections.ac.uk/nesli2/>. It responds to current financial challenges with time and cost saving benefits.

Enhancements

JUSP contains a new usage report. This has been developed following feedback from libraries participating in the JUSP enhancements project. The usage report provides a comparison of titles within a deal across multiple years. This enables you to see which titles have been added to a deal or removed across a range of years.

Making the Most of JUSP: forthcoming workshop

Central Birmingham, 19th April 2012

The JUSP team is pleased to announce the forthcoming free one-day workshop to help you get more out of JUSP. The workshop will provide you with an opportunity to:

- learn more about how JUSP can help you understand e-journal usage and introduce you to some of its more advanced features
- exchange experiences with other members of the ever-growing JUSP community
- provide feedback to the JUSP team

More details about the workshop and how to book will be circulated shortly via the JUSP mailing list. We hope to see you there.

Events

Angela Conyers will be at Stockholm University on 8 February. She will be talking about JUSP and the role of usage statistics in collection management decisions at a seminar on evaluating e- resources organised by the National Library of Sweden.

Publishers and SUSHI

We are delighted to announce that several new publishers joined JUSP in January 2012. We'd like to welcome American Society of Civil Engineers (ASCE), BioOne, Future Science and IOS Press. This brings the total number of publishers, gateways and host intermediaries in JUSP to 23.

We are in discussion with several publishers and in the process of implementing SUSHI. We will provide progress updates via the JUSP mailing list and Twitter.

Libraries

New libraries joining JUSP in January include York St John University and the Medical Research Council (MRC).

We continue to seek feedback from new libraries about use of JUSP and incorporate ideas and suggestions into our development process.

Contact Us

You can keep up-to-date with project developments by visiting our website www.jusp.mimas.ac.uk. We welcome your views on your experience of using the website and portal. Please get in touch if you have comments, questions or ideas for future developments.
