

The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a “one-stop shop” for libraries to view, download and analyse their journal usage reports from multiple publishers. It responds to current financial challenges with time and cost saving benefits.

Institutions joining JUSP in June

Welcome to Abingdon and Witney College, Rose Bruford College and Brooke House Sixth Form College.

Individual title reports now exportable

Following a request, the individual titles reports can now be download in the same way as other reports as a CSV file.

IOP data in Book Portal

We are pleased to announce that both BR2 and BR3 reports have been collected from IOP, for January 2014 to April 2016 inclusive, and are now available in the Book Portal.

If your institution has an ebook collection with IOP and you do not see any usage in the Book Portal then please contact the JUSP helpdesk.

Ebook discussion forum

The JUSP for ebooks service launched earlier this year, but there are a number of challenges still to overcome to improve the situation with regards to collecting and analysing ebook usage statistics. JUSP are facilitating a discussion next month with both library and publisher representatives in order to discuss ebook usage statistics challenges and potential solutions, with the aim of agreeing action points to improve consistency and access to usage statistics.

Upcoming CAG meeting

Our next JUSP Community Advisory Group meeting will take place on July 7th in London. These meetings are always a valuable part of JUSP’s user engagement in terms of understanding more about how people use JUSP, gathering feedback on JUSP, and helping prioritise future developments. We are incredibly grateful to all our Community Advisory Group members (current list available at: <http://jusp.mimas.ac.uk/cag/>).

JUSP helpdesk reminder

If you have any questions about JUSP, either general or specific to your data, please contact JUSP helpdesk rather than individual team members (who occasionally take leave!)

jusp@jisc.ac.uk

FTE figures updated with 2014/15 SCONUL/HESA numbers

Certain reports in JUSP (such as academic year usage profiling etc.) make use of HESA-provided FTE figures included in each year's SCONUL return.

Given that the returns usually take quite some time to produce, the figures we used for 2014/15 and 2015/16 were the same numbers as for 2013/14. Following publication of the 2014-15 SCONUL Annual Statistics on the 15th June, FTE figures for 2014/15 for all HE institutions have been updated accordingly.

Training: JUSP in practice webinar and workshop

On the 7th June we ran a JUSP in practice webinar. A recording is available on the JUSP website under Events and Training.

On the 28th June we ran our second workshop in Manchester. The presentation and exercises are now available on the website. If you would like a login to access the demonstration data please contact the JUSP helpdesk jusp@jisc.ac.uk

This is the last of our currently scheduled training. If you have any suggestions for further training, please contact the helpdesk.

Community Area

We have recently added two more examples to the JUSP Community Support Area. Eric Howard at Leeds Beckett University and Leon Perry at University of Portsmouth have both shared examples of how they present usage data on individual subscriptions at their institutions.

Community area of JUSP was created to provide a space for the community to share guides, examples of good practice and related materials. You can access it by logging into the Portal and selecting the last tab on the welcome screen. If you have any templates, guides, or anything else that you use with JUSP and think may help other JUSP users please let us know via the helpdesk.

JUSP team out and about

Next month Jo Alcock will be presenting on behalf of the JUSP team at the CILIP Conference 2016. The presentation will be on Wednesday 13th July and is titled, 'Are your ebooks being used?'. It will focus on exploring the potential of the JUSP ebooks service to enable libraries to collect and analyse usage statistics for their ebooks.
