

The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a “one-stop shop” for libraries to view, download and analyse their journal usage reports from multiple publishers. It responds to current financial challenges with time and cost saving benefits.

Another library joins JUSP

Welcome to Writtle College who joined JUSP in May.

More book data in JUSP

We now have BR2 data for the Royal Society of Chemistry and both BR2 and BR3 data for Oxford University Press. The additional data benefit 155 institutions.

Wiley data for 2015 reinstated

We have been alerted by a JUSP member that Wiley data for 2015 may have been restated by the publisher. We will be replacing data for 150 JUSP sites over the next couple of days and the JUSP libraries mailing list will be notified once complete.

New publisher wishlist – view the most requested publishers

To help us prioritise which publishers you would like us to approach regarding JUSP we have been running a rolling survey to collect suggestions from libraries. To ensure greater transparency we now show you the publishers that have been requested and what progress we have made with them.

You can now view the publishers/providers for which we have received three or more requests via our Participants page <http://www.jusp.mimas.ac.uk/participants>. You can also view the status of the most requested publishers and add suggestions via the “Publisher issues / wishlist” tab in the Portal.

Upcoming events

JUSP in practice webinar – Tuesday 7th June 11am - Register at: <https://www.eventbrite.co.uk/e/jusp-in-practice-registration-25161553885>

JUSP workshop (Manchester) – Tuesday 28th June – Register at: <https://www.eventbrite.co.uk/e/journal-and-ebook-usage-statistics-with-jusp-manchester-tickets-24989041897>

Contact Us

You can keep up-to-date with project developments by visiting our website www.jusp.mimas.ac.uk.

We welcome your views on your experience of using the website and portal.

Please get in touch if you have comments, questions or ideas for future developments.

Enhancements

Following feedback from the workshop, a number of tweaks have been made to JUSP report views to make them easier to use.

- The "overall total" figures now appear at the top of the SCONUL return and the two 'annual summary usage of publishers' reports. Various attendees suggested this enhancement, so they would not need to scroll through the long publisher list to get total figures
- All 'summary reports' now list publishers in alphabetical order
- Various columns have been better aligned to enhance the readability of the data
- An extra column has been added to the report "JR1 excluding backfiles and GOA" to show "Direct JR1 minus archive and GOA"

If you have any suggestions for enhancements to JUSP, please let us know at jusp@jisc.ac.uk

<u>Direct JR1</u>	<u>Direct JR1a</u>	<u>Direct JR1-JR1a</u>	<u>Direct JR1 GOA</u>	<u>Direct JR1 minus JR1a and GOA</u>	<u>Total intermediary JR1</u>	<u>Total current</u>	<u>Total current - GOA</u>

New group added to usage profiling

Following a request, an additional group of institutions has been added to usage profiling. The group is "1960s" and it includes institutions who became Universities in the 1960s following the Robbins report. If you are one of these institutions you can now compare your usage to the average usage of this group in JUSP.

Workshops

On 18th May we held our first JUSP workshop of the year, and had over 20 attendees. The workshop included demonstrations and exercises covering both journal and ebook portals and gave attendees the opportunity to practice using JUSP to help with a number of different types of scenarios. We also provided details of ongoing and forthcoming developments to the service.

Due to a high level of demand, we are running a repeat of this workshop, again in Manchester, on Tuesday 28th June. For further information and to book your place, visit: <https://www.eventbrite.co.uk/e/journal-and-ebook-usage-statistics-with-jusp-manchester-tickets-24989041897>

Presenting and sharing usage data in different ways

Thank you for everyone who submitted example of how you present your usage data. We received 10 interesting and varied examples. The prize draw has been drawn and the lucky winner contacted.

A write up with examples will be shared within the next few weeks in the community area and via the mailing list.

In brief, the key audiences were faculty/academic/subject librarians and library management, with one example of a publically available report. The purposes of these representations were around trends, renewals and cancellations, but each example had a unique take on how to handle and present data.
