

## The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) provides a “one-stop shop” for libraries to view, download and analyse their usage reports from NESLi2 publishers <http://www.jisc-collections.ac.uk/nesli2/>. It responds to current financial challenges with time and cost saving benefits.

### JUSP Publishers

We are delighted to announce that the American Association for the Advancement of Science (AAAS) recently confirmed their participation in JUSP.

AAAS join the Institute of Physics (IOP), Edinburgh University Press (EUP), Emerald Publishing, Royal Society of Chemistry, Annual Reviews, Elsevier, Sage, Publishing Technology (ingentaconnect), Nature Publishing Group, Springer, Oxford University Press, Swets, American Institute of Physics (AIP), EBSCO EJS and Project MUSE/The Johns Hopkins University Press.

The recent survey highlighted future priorities and several new publishers have been invited to join JUSP. The results of the survey are now available via our website. Our current priority continues to be NESLi2 publishers and we will be announcing further participation shortly.

### JUSP Libraries

We would like to welcome all libraries that have recently joined JUSP. Libraries joining in September include Birmingham City University, Liverpool John Moores University, London Business School, Roehampton University, St Marys University College Belfast, Teesside University, University of Bolton, University of East London and University of Lincoln. 117 UK higher education libraries are now participating in JUSP and many in the process of joining.

We're interested to find out whether you've used the SCONUL report in JUSP this year to assist with completion of the annual statistical survey. We plan to seek feedback from you shortly.

### SUSHI

In September we started to gather usage data via SUSHI from Annual Reviews, Swets and the American Association for the Advancement of Science (AAAS). We are currently working with Emerald Publishing and Edinburgh University Press (EUP) and plan to implement SUSHI for these publishers during the next few months.

### JUSP Enhancements

Work has begun on the JUSP enhancements project which involves:

1. Publisher deals identification
2. Addition of subscribed journal title reports

We'd like to thank the libraries that have volunteered to participate in the pilot and started to test the new enhancements. We'll continue to update you as the project develops.

### Contact Us

You can keep up-to-date with project developments by visiting our website [www.jusp.mimas.ac.uk](http://www.jusp.mimas.ac.uk). We welcome your views on your experience of using the website and portal. Please get in touch if you have comments, questions or ideas for future developments.
