The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a "one-stop shop" for libraries to view, download and analyse their journal usage reports from multiple publishers. It responds to current financial challenges with time and cost saving benefits.

JUSP welcome new publishers

We are pleased to welcome three new participating publishers: Informa Healthcare, National Academy of Sciences, and the Seismological Society of America.

Data from the National Academy of Sciences and the Seismological Society of America are now available in JUSP.

We are working with Informa and will let you know when their data is available.

Making the Most of JUSP, University of Bath, 4th June

The next 'Making the most of JUSP' event will be held on Wednesday 4th June at the University of Bath.

Booking for this free event is now open at https://www.eventbrite.co.uk/e/making-the-most-of-jusp-bath-tickets-11400957571.

Take this opportunity to: learn more about how JUSP can help you understand e-journal usage and explore some of its more advanced features; exchange experiences with other members of the JUSP community; find out more about how JUSP is interoperable with other services including KB+; and, provide feedback to the JUSP team to inform development of the service.

Publisher update (part 2)

Following last month's summary of progress with the 22 priority publishers identified in the last survey, here is more detailed information on the individual publishers.

In addition to the nine priority publishers who have joined JUSP since the survey (listed last month), further publishers from the priority list are in discussions with JUSP about the possibility of joining. These include Proquest, Wolters Kluwer/Ovid, Gale Cengage, Palgrave Macmillan, Lippincott Williams and Wilkins, Mary Ann Liebert and American Society of Mechanical Engineers (ASME)). Publishers often indicate consumer demand as a reason for participation and lack of demand as a reason for non-participation. We would encourage you to contact your publisher representative if you subscribe to titles from any of these publishers particularly and you would like to see that usage reflected in JUSP.

And finally a quick reminder that the team has created a rolling publisher 'wish list' for JUSP institutions to suggest potential publishers at any time throughout the year. It can be found here: https://www.surveymonkey.com/s/JUSP_Pub_Wish_List.
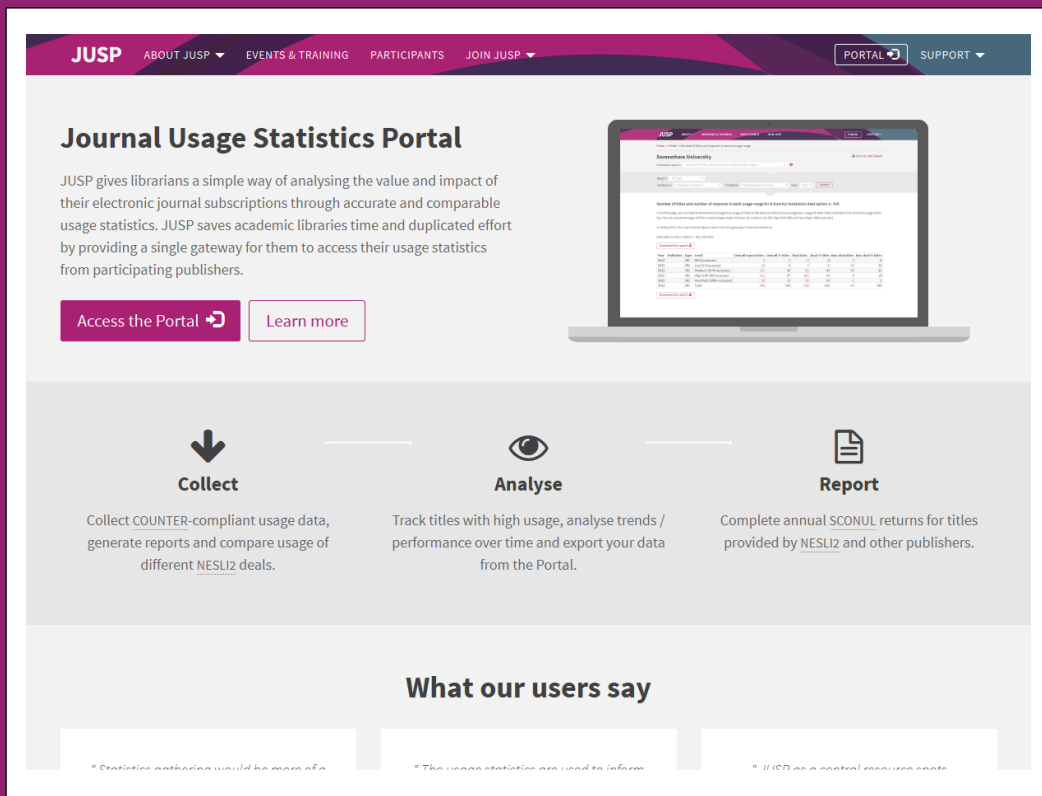

Contact Us

You can keep up-to-date with project developments by visiting our website www.jusp.mimas.ac.uk.

We welcome your views on your experience of using the website and portal.

Please get in touch if you have comments, questions or ideas for future developments.

New JUSP website coming soon!

Look out for the new JUSP website which will be launched shortly.

If you are interested in providing feedback on the new website, please contact our helpdesk jusp@mimas.ac.uk.

Report and slides from the Making the Most of JUSP event in London

A report on the recent 'Making the Most of JUSP' event in London is now available on the events page of the JUSP website (http://jusp.mimas.ac.uk/events.html) together with copies of the presentations.

The exercises and answers used in the event will be made available on the JUSP website after this series of events.
