JOURNAL USAGE STATISTICS PORTAL

The Journal Usage Statistics Portal (JUSP)

The Journal Usage Statistics Portal (JUSP) is a Jisc-funded service that provides a "one-stop shop" for libraries to view, download and analyse their journal usage reports from multiple publishers. It responds to current financial challenges with time and cost saving benefits.

Ebook data - publishers

Currently, we have book data for the following publishers:

* ACS

* ASCE

* Emerald

* Future Medicine

* ICE

* SIAM

* Springer

* T&F will be included shortly after supplying SUSHI credentials

We are working with the following to fix compliance issues: Elsevier, IEEE, IOPScience, Nature, OUP, RSC, Silverchair and Wiley.

JUSP for ebooks now live

We are pleased to announce that JUSP now contains ebook usage data in addition to journal usage statistics. A pilot group of JUSP-participating libraries have helped to shape this first iteration of the new service. Additional requirements that emerge through use of the service will continue to inform development from this point on.

To access ebook data in JUSP log in to JUSP http://jusp.mimas.ac.uk and select BOOK PORTAL from the banner at the top right.

If you have previously registered to use the service you will gain immediate access. Otherwise, you will be redirected to the Books Service registration form. Please fill in your details and submit the form. As soon as we have processed your registration we will send you an email.

Guides, FAQs and glossary for ebook reports

Guides to the various ebook reports are now available on the JUSP website. We have also updated our FAQs and Glossary.

Have another question? Please email jusp@jisc.ac.uk

Contact Us

You can keep up-to-date with project developments by visiting our website www.jusp.mimas.ac.uk.

We welcome your views on your experience of using the website and portal.

Please get in touch if you have comments, questions or ideas for future developments.

Upcoming training events

We are currently planning our series of webinars and workshops for the upcoming months. The first workshop will incorporate both journals and ebooks and will include demonstrations and practical exercises to get you using the reports. The workshop will be held in Manchester on Wednesday 18th May. Booking is now open at:

https://www.eventbrite.co.uk/e/journal-and-ebook-usage-statistics-with-jusp-manchester-tickets-21426200342

We will also have additional events and webinars, and will let you know about those in future newsletters.

Ebook aggregators

There is significant interest from JUSP libraries in being able to access usage data from ebook aggregator services.

Unfortunately, the majority of these aggregator services, including Dawsonera, EBL, Ebrary and MyiLibrary do not currently support the SUSHI protocol.

New library joins JUSP

Welcome to Moulton College joining JUSP end of February.

Current publisher issues – journals and books

You can view a list of current publisher issues from the CURRENT PUBLISHER ISSUES tab of your welcome screens. This is available for both the journal and book portals.

JOURNAL USAGE STATISTICS PORTAL

Book reports

Take a look at the new book reports in JUSP and tell us what you think.

Generate a report:	Please select ▾
	Please select
	-- Book level reports --
	Book Report 1: Number of Successful Title Requests by Month and Title
	Book Report 2: Number of Successful Section Requests by Month and Title
